Conductivity is the total amount of dissolved solids which is the conductivity of the total ions in the water
The quality of the reaction water

Measuring range: 0 ~ 10000uS/cm
10.01-19.99ms
20.1-400mS/CM

TEST BEFORE DRINKING

TDS value represents total soluble solids content in water
The lower the TDS value, indicating the solubility of heavy metal ions in water
